

Lightning Remote Counter

A PAST TIME I-BOLT SERVICE

GOAL

Record and locate all lightning strokes to or next to your facilities, to help check efficiently for any potential problem or damage after on site lightning activity, or prove act-of-God cause of a possible problem.

PRINCIPLE

Meteorage is the operator of a large and precise real-time lightning detection network.

Meteorage proposes a Lightning Remote Counter Service, upon a yearly subscription, with a very simple access, no necessary additional equipment on your site and no maintenance.

The I-BOLT Remote Counter provides you with the number and details of all lightning strokes located in your reference zone. Your reference zone is a circle with a 2 km radius (or more as an option) centered on your facility.

The list of all lightning strokes detected by Meteorage is sent as a pdf-file via e-mail to the identified person in charge, on the day following each lightning day over the site.

You can also connect online at www.meteorage.co.uk and review the detailed past lightning activity over your site, as daily or monthly reports. These information are available online starting from the beginning date of the subscription and over a shifting one year period. Previous lightning information can also be available as an option, at additional cost (*).

Access to this information is available 24/7 online and is protected by your personal access code.

DATA

Three different types of Remote Counters are available, depending on the chosen details of information.

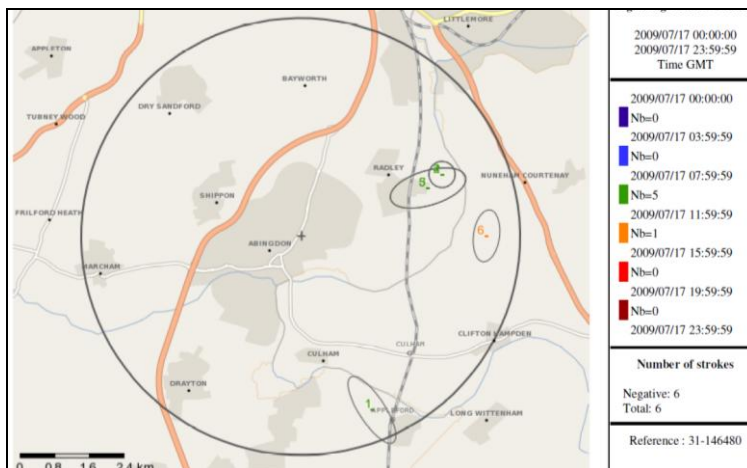

Provided Data Type of Remote Counter	Number of Strokes	Date and Time	Sign and Amplitude in kA	Geographic Coordinates Lat – Lon in degrees	Distance to site and direction	Accuracy of the location (ellipse)	Map Option
Stroke	X	X	X				
Location	X	X	X	X	X		X
Ellipse	X	X	X	X	X	X	X

(*) Prices of option upon request.

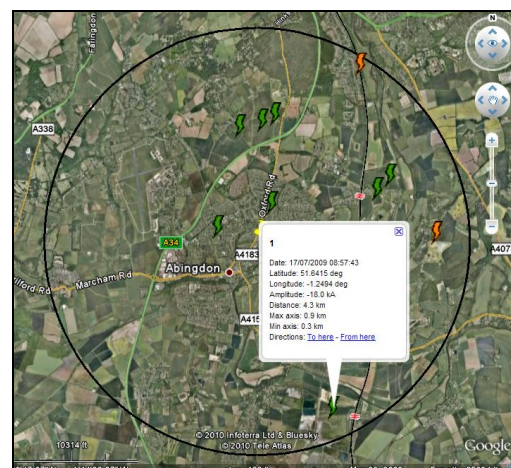

MAP OPTION

In addition to the detailed list of strokes sent by email, you can also receive a map in a pdf file and a kmz file with all the lightning strokes detected on your reference zone. The kmz file enables you to visualize the lightning strokes in your reference zone with a software like Google Earth and Google Maps.

Map Option with ellipses

Google Earth Visualisation

These maps are also available online on your personal account.

PRICES

Type of Remote Counter	Prices	In £ per year (VAT not included)	With Map Option
Stroke		£ 420	
Location		£ 470	£ 570
Ellipse		£ 520	£ 620

Prices are listed here as an indication, but they may be modified at any time and without notice.

CONTACT AND ORDER

- Contact Météorage by phone in the UK (08455 829 839) or in France (+33 559 809 839) or by email at commercial@meteorage.co.uk.
- Requirements: web-browser, email address to receive the detailed lists of lightning strokes, software to read the pdf files.
